

1/4" White Non-Print Border Area

5.5" Final Product Trim

5" Final Image & Copy Area

5.5" x 8.5" Non - Bleed Product

File Creation Tips:

Note: All blacks areas will default to overprint.

Adding "Rich Black Kickers" to large black areas and large bold black type over 36pts will create a darker black, in those areas. Adding these "Rich Black Kickers" will ensure the correct color balance in the 4 color image photo art. Recommended "Rich Black Kicker" settings: 70% Cyan and 100% Black.

Avoid using White (Reversed/Knock-Out) type smaller than: 8pt over black solid areas and 10pt over 4 color areas.
