Non-Bleed Product

5.50.x8.50

File Creation Tips:

Note: All blacks areas will default to overprint.

Adding "Rich Black Kickers" to large black areas and large bold black type over 36pts will create a darker black, in those areas. Adding these "Rich Black Kickers" will ensure the correct color balance in the 4 color image photo art.

Recommended "Rich Black Kicker" settings:

66% Cyan, 57% Mag, 57% Yellow and 100% Black = 280 Max Den.

Avoid using White (Reversed/Knock-Out) type smaller than: 8pt over black solid areas and 10pt over 4 color areas.
